

## **Band Requirements**

(Please use the helpful check boxes on the left to tick off each item once it's been organised with your venue.)

- ☐ • Minimum Stage size/performance area: 5 meters wide & 4 meters deep.
- ☐ • A minimum of 4 reliable virgin wall power sockets (not a 4 way).
- ☐ • We require 2 hours to set up and sound check. It's a large and technically demanding stage set up with many moving parts, as you know we're far more than just a 'turn up and jam' style band ;) We're very used to setting up while people are eating, so don't let that worry you, we'll be as discreet as possible. After setting up, we'll need around 20 minutes to get changed (assuming we're provided with a changing room. A toilet will not be sufficient for our needs). Please be aware that things such as not being provided a changing room, not having easy access to the stage or parking spaces can all lead to delays, so getting these details right will really help us give you the best and smoothest experience on the day.
- ☐ • Two free parking spaces, one of which is located at the door to the performance venue, so we can unload the heavy equipment from van. The closer this door is to the stage, the faster we will be setting up for you.
- ☐ • A clear path from the loading in doors to the stage area. Some of our gear is large and heavy, so we'd rather not be wrestling with tables or trying to squeeze through crowds while carrying it! ;)
- ☐ • If you are planning to have us perform outside, you must provide a waterproof roof, back and sides to protect us from the elements. The roof will need to overhang the front of the stage to protect our speakers and front-of-stage lights. We cannot risk our equipment being rained on, no matter how 'unlikely' it may feel that it won't happen. We also need to be on a hard, flat and solid floor or staging. Our staging size requirements are 5 meters width x 4 meters depth.
- ☐ • We will require a dedicated room for the band: Somewhere warm and dry for us to hang around in throughout our time at the venue, get changed in and eat in etc. Please note: a "toilet" is not sufficient. All wedding venues provide a bridal suite or have various rooms such as offices etc, and though they may need convincing, your venue will need to provide this for us.
- ☐ • We will need to be fed and watered! We work a very long, hard day (usually around 21 hours) and we usually don't have time to stop and eat! So the meal you provide for us will likely be the only meal we get to eat all day. With that in mind, we ask for 4, substantially sized, plated hot meals (as apposed to the evening snacks ie sandwiches, fish fingers etc) either before we go on or during a 1 hour break between sets. Our dietary requirements are: 3 meat (of which 1 is gluten free) and 1 vegetarian meal.
- ☐ • We also require free drinks to be provided to us throughout our time at the venue. We've found that a bar tab is often the easiest way for clients to arrange this. That way we don't need to bother anyone whenever we need a drink. Please ensure this is set up and arranged with your venue prior to us arriving as we'll be in full 'manual labor' mode as soon as we arrive for the next 2 hours.

Please note, these requirements are stipulated within all of our booking contracts.

Thanks!
